ABOUT

Computer Science undergraduate with a strong foundation in front-end development and problem-solving. Focused on building clean, responsive web applications and steadily progressing toward full-stack development through hands-on projects and consistent practice.

EDUCATION

B.Tech in Computer Science Engineering

Vignan's Institute of Information Technology

2024 – 2028 | Currently 2nd Year

TECHNICAL SKILLS

Languages	C, Java, JavaScript
Frontend	HTML5, CSS3, JavaScript, Bootstrap 5
Tools	Git, GitHub, VS Code
Core Concepts	DSA (Basics), DOM Manipulation, Responsive Design

PROJECTS

Expense Splitter

- Built accurate expense-sharing logic among multiple users
- Designed a clean and intuitive user interface

Job Board Web Application

- Responsive job listings with filters and structured UI components

Finance Dashboard

- Interactive dashboard UI focused on clarity and usability

Utility Projects

- Countdown Timer, Calculator, JavaScript mini apps for logic and DOM mastery

CAREER GOAL

To grow into a skilled full-stack developer by mastering frontend, backend, and system-level thinking, and by building impactful, real-world applications.
